A CHRONOLOGY OF THE WAR IN EUROPE: 100 OUTSTANDING DATES

1939

MARCH: Winston Churchill, First Lord of the Admiralty, reveals the British war plan to France.

APRIL: British troops land in Norway.

MAY: The Battle of Crete begins.

JUNE: Germany invades Poland, beginning World War II.

JULY: The Battle of Britain begins.

AUGUST: German forces occupy Denmark and Norway.

SEPTEMBER: The Battle of Britain continues.

OCTOBER: The Battle of Britain ends.

1940

MARCH: The Battle of Dunkirk begins.

APRIL: The Battle of Britain intensifies.

MAY: The Battle of France begins.

JUNE: Germany invades Belgium, the Netherlands, and Luxembourg.

DECEMBER: The Battle of Britain intensifies.

1941

MARCH: The Battle of Midway begins.

APRIL: Germany invades Greece.

MAY: The Battle of Britain intensifies.

JUNE: Germany invades Russia.

JULY: The Battle of Britain intensifies.

AUGUST: The Battle of Britain intensifies.

SEPTEMBER: The Battle of Britain intensifies.

1942

MARCH: The Battle of Midway ends.

APRIL: The Battle of Britain intensifies.

MAY: The Battle of Stalingrad begins.

JUNE: The Battle of Britain intensifies.

JULY: The Battle of Britain intensifies.

AUGUST: The Battle of Britain intensifies.

1943

MARCH: The Battle of Midway ends.

APRIL: The Battle of Britain intensifies.

MAY: The Battle of Stalingrad ends.

JUNE: The Battle of Britain intensifies.

JULY: The Battle of Britain intensifies.

AUGUST: The Battle of Britain intensifies.

1944

MARCH: The Battle of Midway ends.

APRIL: The Battle of Britain intensifies.

MAY: The Battle of Stalingrad ends.

JUNE: The Battle of Britain intensifies.

JULY: The Battle of Britain intensifies.

AUGUST: The Battle of Britain intensifies.

1945

MARCH: The Battle of Midway ends.

APRIL: The Battle of Britain intensifies.

MAY: The Battle of Stalingrad ends.

JUNE: The Battle of Britain intensifies.

JULY: The Battle of Britain intensifies.

AUGUST: The Battle of Britain intensifies.

SEPTEMBER: The Battle of Britain ends.

OCTOBER: The Battle of Britain ends.

1946

MARCH: The Battle of Midway ends.

APRIL: The Battle of Britain intensifies.

MAY: The Battle of Stalingrad ends.

JUNE: The Battle of Britain intensifies.

JULY: The Battle of Britain intensifies.

AUGUST: The Battle of Britain intensifies.

1947

MARCH: The Battle of Midway ends.

APRIL: The Battle of Britain intensifies.

MAY: The Battle of Stalingrad ends.

JUNE: The Battle of Britain intensifies.

JULY: The Battle of Britain intensifies.

AUGUST: The Battle of Britain intensifies.
ARMY SHIFTS TO PACIFIC
NEXT BIG WAR PROBLEM

Turning Our Forces Against Japan Is Question of Logistics and Morale

By HANSON

W. BALDWIN

With the collapse of Germany's defenses, the spotlight of war shifts to the Pacific and American forces prepare for the next big war problem.

The spring of 1945 in Europe was not unlike the autumn of 1944, when the Nazis were still a foot away from Russia. But now the Allies have taken the war to the Japanese home islands, and the next big war problem is how to win in the Pacific.

The job of preparing for the Pacific war is huge. The logistics problem is complex and difficult. The Japanese home islands are vast and span a large area of the Pacific. The transportation problem alone is enormous. The Allies must be able to move their forces quickly and efficiently across the Pacific Ocean.

The logistic problem is perhaps the most challenging aspect of the Pacific war. The Allies must be able to supply their troops with everything they need to win. This includes food, ammunition, medical supplies, and other essential items.

The next big war problem is also a moral one. The Allies must be able to maintain the morale of their troops. The Pacific war will be long and hard. The Allies must be able to keep their troops motivated and ready to fight.

The Pacific war will be a test of the Allies' ability to plan and execute a complex and challenging war. The Allies must be ready to face the next big war problem head-on.

As the Allied powers prepare for the next big war problem, they must be aware of the challenges they will face. The logistics problem is immense, and the moral problem is just as critical. The Allies must be ready to meet these challenges and win in the Pacific.
ARMY SHIFT TO PACIFIC NEXT BIG WAR PROBLEM

Turning Our Forces Against Japan Is Question of Logistics and Morale

By HANSON W. BALDWIN

The next big problem is how best to shift our forces from the Pacific to the shores of Japan. The problem can be divided into five phases: (1) the transportation of the troops; (2) the redistribution of the troops to Japan; (3) the reduction of the forces in Europe; (4) the administration of the occupation; and (5) the maintenance of the forces in Japan.

The transportation of the troops is the easiest phase, since the United States has many ports and land areas available in the Pacific from which to transport the men to the shores of Japan. The distances involved are not great, and the transportation problem can be handled by our existing resources.

The redistribution of the troops is the next phase, and it is here that the problem begins to become more complex. The United States has many ports and land areas available in the Pacific from which to transport the troops to Japan. The distances involved are not great, and the transportation problem can be handled by our existing resources.

The reduction of the forces in Europe is the next phase, and it is here that the problem begins to become more complex. The United States has many ports and land areas available in the Pacific from which to transport the troops to Japan. The distances involved are not great, and the transportation problem can be handled by our existing resources.

The administration of the occupation is the next phase, and it is here that the problem begins to become more complex. The United States has many ports and land areas available in the Pacific from which to transport the troops to Japan. The distances involved are not great, and the transportation problem can be handled by our existing resources.

The maintenance of the forces in Japan is the final phase, and it is here that the problem begins to become more complex. The United States has many ports and land areas available in the Pacific from which to transport the troops to Japan. The distances involved are not great, and the transportation problem can be handled by our existing resources.

Logistics of the Approximately 8,050,000 American Men Now in Europe Will Be Transferred to the Far East

By HANSON W. BALDWIN

The next big problem is how best to shift our forces from the Pacific to the shores of Japan. The problem can be divided into five phases: (1) the transportation of the troops; (2) the redistribution of the troops to Japan; (3) the reduction of the forces in Europe; (4) the administration of the occupation; and (5) the maintenance of the forces in Japan.

The transportation of the troops is the easiest phase, since the United States has many ports and land areas available in the Pacific from which to transport the men to the shores of Japan. PUMPS Just Happened To Us

Pumps are now made in all kinds of materials, from plastic to stainless steel. The plastic pump is ideal for the home and outdoor use, and the stainless steel pump is perfect for the industrial use. The plastic pump is made from a material that is resistant to corrosion and is easy to clean. The stainless steel pump is made from a material that is strong and durable.
